

# BIOSEM NEWSLETTER N3

**BIOETHICS AND SUSTAINABLE ENVIRONMENTAL MANAGEMENT IN SCHOOLS ( 2022-I-SI01-KA220-SCH-000086423)**

## TPM 2 BURSA (TURKEY)

The second meeting of the "Bioethics and Sustainable Environmental Education" project, approved by the Slovenian National Agency under the KA220 School Education initiative for 2022, took place on March 16-17 at the Bursa Osmangazi District Directorate of National Education. During this project meeting, discussions centered around social club activities and scenario-based education pertaining to Bioethics and Sustainable Environmental Education at the high school level.

Certificates were awarded to participants by Mr. Gürhan Çokgezer, the Osmangazi District Director of National Education. Project partners from Slovenia, Italy, North Macedonia, Germany, and Şükrü Şankaya Anatolian High School also had the opportunity to explore various historical areas of Bursa.

# Learning and Training activity in DAUGAVPILS (Latvia)

Engaging in activities focused on sustainable environments and the bioethics elective course, teachers, and students from Turkey, Latvia, Slovenia, and Italy participated in the training session.

## WHAT IS NEXT?

The Bioethics Competency Framework for High Schools is a way to look at how humans interact with life in all its forms – people, animals, and the environment. We've chosen seven scenarios that fit within bioethics and are suitable for high school students:

1. Global Justice
2. Climate Change
3. Human Development
4. Ecosystem Health and Water Resources
5. Science and Technology
6. Animal Living
7. Minimalist Living
